

DIRECTIONS FOR USE

For General Use:

Spread drySTART on wet or damp areas at the rate of 50 to 100 g/m² (1 oz = 28.35 g; 10 ft² = 1 m²), weekly or as needed, to help improve the overall environment. The amount and frequency of use may be increased or decreased as required without risk.

For Swine:

Farrowing Sows, Dry Sows, Nursery and Grower/Finisher Units:

Apply drySTART at 100 to 150 g/m² after the room is cleaned, before filling with pigs. Repeat as required.

Farrowing Crates/Pen:

Continue using drySTART daily at 50 g/m² for the first 7 days after farrowing. Repeat as required.

For Dairy and Beef Cattle:

Dairy Cows (Stalls):

Apply drySTART at a rate of 100 g/m² on top of bedding. Repeat as required.

Calving Pens, Calf Pens and Hutches:

Apply drySTART before bedding at the rate of 150 g/m². Repeat weekly or as required.

For Poultry:

Apply when starting a new flock at the rate of 50 to 100 g/m² after the room is cleaned before filling. Apply additional drySTART around watering and feeding areas as required.

For Equine:

Apply drySTART weekly at the rate of 200 g/m² on floor or with bedding.

Livestock Transportation Trucks:

Apply drySTART at the rate of 150 g/m² after trucks are cleaned.

HANDLING AND STORAGE

Keep container closed and store in a cool, dry area for maximum stability. Avoid leaving container open for extended periods of time.

CAUTIONS

Do not mix with other products. Keep out of reach of children.

drySTART drying powder is intended to be used as part of a comprehensive livestock facility hygiene management program, including washing between groups and disinfecting. As with any product containing fine particles, proper personal protective equipment should be worn. Safety precautions should be taken in accordance to industry standard health and safety programs. See MSDS for additional details. Check with your local regulatory body in regards to acceptable dust levels.

**READY-TO-USE
DRYING POWDER
FOR ANIMAL HOUSING**

**START YOUR FUTURE NOW WITH OUR
RESEARCH-PROVEN PRODUCTS – EACH ONE
TARGETED TO PROVIDE A SPECIFIC SOLUTION.**

A ready-to-use drying powder that can be used with all classes of livestock. Easy to use and handle.

HOW IT WORKS

The principle behind the effectiveness of drySTART™ is simple; help optimize animal environment which can increase your economic returns by:

- **Drying the Environment** – drySTART helps to absorb moisture. Use drySTART as part of your livestock facility management program to help maintain a dry environment between bedding and/or washing.
- **Creating a positive environment** – reducing odors helps maintain a positive environment for the livestock and the people working with the livestock.

WHEN TO USE IT

Using drySTART wherever you have damp and/or dirty floors helps dry the environment where livestock are housed. drySTART may also help reduce unpleasant ammonia odors in livestock bedding. Using drySTART is an economical way to help create a better environment for your livestock and staff.

APPLICATIONS

The environment in which you and your staff work and raise your livestock is becoming more important every day. To succeed you need to provide well balanced feed, a good environment and minimize stress. Provide your animals with a great start and create a better environment for your livestock and your staff. Make drySTART part of your comprehensive livestock facility management program and see results right away. drySTART is an amazingly effective drying agent and deodorizer designed for a wide range of species and production applications.

Pork Production

Use drySTART in all stages of pork production from farrowing and nursery barns right through to finishing.

Dairy

For dairy cows and calves, damp bedding can lead to a poor environment including unpleasant odor. Apply drySTART to help keep bedding dry and draw moisture away from the animal.

Livestock Transportation

Use drySTART to absorb excess moisture in hard-to-reach areas that remains after cleaning.

Poultry

In poultry, moisture and high humidity may increase barn odor. Apply drySTART on poultry pen floors and around feeding and drinking areas to help create a more fresh environment.

Equine

Make your horse barn a positive place for horses and guests. Apply drySTART to bedding to help decrease moisture and unpleasant odors.
