

# CapriLait (24/19)

Milk Replacer for Dairy Replacement Doe Kids  
[www.GroberNutrition.com](http://www.GroberNutrition.com)

## Product Overview

Grober CapriLait is a specially formulated milk replacer with the dairy doe in mind. A combination of nutritional components designed to optimize the structural growth necessary for the high performing lactating goat.

Features	Benefits
All milk protein formula	Specific protein blend for superior digestion
Fat source blend	Maximize digestion and beneficial fatty acid profile
Fat to Protein ratio	Lower fat to protein ratio for leaner growth
Machine feeding	Can be used in automatic kid feeding machines

## Kid Management Tips

- ✓ Place kid goats in a clean and dry area immediately after birth
- ✓ Feed LambGro/KidGro™ Colostrum as soon as possible after birth in 3 feedings within 18 hours of life
  - ✓ Feed by bottle or use a feeding tube if necessary
- ✓ Ensure the kid pen is free of draft and is clean and warm
- ✓ Start feeding milk replacer daily up until weaning
- ✓ Free-choice water should be available at all times
- ✓ Multiple feedings/day recommended to reduce incidence of bloat

## Shelf Life and Storage

Store in a cool, dry place up to 1 year from date of manufacture. Store opened bags in a sealable container.

## Mixing Directions

1. Weigh 150g of powder per litre of solution using a scale.
2. Mix with 0.5 litre hot water (60°C) for 3 minutes.
3. Add 0.45 litre cool water and mix for 1 minute (total 1 litre).
4. Feed the milk solution at a temperature of 38-40°C (body temperature) (thermometer provides best results).
5. Clean all feeding utensils and equipment after each use.

## Feeding Schedule

Age of Kid	Amount Per Feeding	Number of Feedings/Day
Day 1-2 (colostrum)	250	4
The newborn kid should receive 150mL/kg bodyweight of colostrum (approx. 600mL), within six hours of birth. (*LambGro/KidGro™ Colostrum Replacer)
