

## KidGro ASure (22/25)

Milk Replacer for Dairy Replacement Doe Kids & Meat Kids

[www.GroberNutrition.com](http://www.GroberNutrition.com)

### Product Overview

Grober KidGro ASure is a mildly acidified kid milk replacer which is formulated to optimize energy and protein density to meet specific nutrient requirements of young growing kids. Mild acidification can be a useful management tool for sustaining kid vitality. KidGro ASure milk replacer makes an excellent fit for automatic milk feeders to provide small, multiple nutrient dense meals for ease of digestion.

| Producer Objectives  |
|--|
| Provide a protein source and amino acid balance for optimal growth and metabolic control |
| Provide highly digestible nutrients for growth and health                                |
| Reduce the pathogen load in the gastrointestinal tract                                   |
| Used in automatic kid feeding machines   |

### Kid Management Tips

- ✓ Place kids goats in a clean and dry area immediately after birth
- ✓ Feed colostrum as soon as possible after birth and a second feeding within the next 12 hours
  - ✓ Use a feeding tube if necessary
- ✓ Ensure the kid goat pen is free of draft and is clean and warm
- ✓ Start feeding milk replacer daily up until weaning
- ✓ Free-choice water should be available at all times
- ✓ Multiple feedings/day recommended to reduce incidence of bloat

### Shelf Life and Storage

Store in a cool, dry place up to 1 year from date of manufacture. Store opened bags in a sealable container.

### Mixing Directions

1. Weigh 5.75oz of powder per quart of water using a scale.
2. Mix with 0.5 quart hot water (130°F) for 3 minutes, add 0.45 quart cool water and mix for 1 minute (total 1 quart).
3. Feed the milk solution at a temperature of 101°F (body temperature) (thermometer provides best results).
4. Clean all feeding utensils and equipment after each use.

### Feeding Schedule

| Age of Kid        | Amount Per Feeding (Fluid oz) | Number of Feedings/Day  |
|-------------------|-------------------------------|-------------------------|
| Day 1 (colostrum) | (0.8oz/lb of body weight)     | Within 6 hours of birth |
| Day 2-5           | 10.2                          | 3                       |
| Day 6-14          | 17                            | 3                       |
| Week 3-6          | 27.2                          | 3                       |
| Week 7            | 27.2                          | 2                       |
| Week 8            | 17                            | 1                       |

This schedule is a guideline only, and should be adjusted to the needs of the kid goat.
